DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim 3 is objected to because of the following informalities: The claim does not have a period at the end. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 1-5 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose or suggest a device having all of the recited limitations. While various Braille display devices are known, there is no suggestion of a device having the features of the guide stick and header recited in claim 1. As a result, the claims contain allowable subject matter.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kajino, Schleppenbach, Prince, Becker, Schmidt, Tieman, Litschel, Ida, Petersen and Lindenmueller disclose various Braille display devices.
